

smrter Hydra^{ULTRA}

USB C, Lightning, Micro-USB, OTG - smrter Hydra ULTRA - the 5in1 allrounder

The Smartphone with USB Type C, the Tablet with Lightning and the Action Cam has a Micro-USB port? Many people have the problem to find the right charging cable for every different device - especially problematic now that many USB sockets are already replaced by new USB C sockets.

The 5in1 multi-talent

To finally fight the cable chaos smrter sends the Hydra ULTRA into the ring. The 120 cm long nylon charging cable has the right connection for almost every current smartphone or tablet, no matter if Micro-USB, USB C or Lightning. The charging current of up to 3A (with simultaneous charging of three devices, otherwise up to 1.5A individually) ensures a fast charging process and even allows the simultaneous charging of three different devices. An ideal charging cable for the whole family!

USB/USB-C combi connector

Whether car, desktop PC, MacBook, Powerbank or laptop - many new devices do not have classic USB sockets anymore, but have been converted to the new USB C sockets. The Hydra ULTRA is equipped with a special USB/USB-C combination port to be perfectly equipped for all connection types now and in the future. The conventional USB adapter can simply be removed so the USB-C port behind it can be used.

Robust due to aluminium and nylon

The braided nylon sheathing provides the cable with the necessary stability and prevents unintentional tangling and knotting of the cable. The additional anti-kink reinforcement of the adapters makes the cable ideal for long-term use, whether at home or on the road. With the attached Velcro cable fastener, the cable can be stowed away instantly and without cable clutter.

OTG sharing function

But that's not all. The charging cable also supports USB On-The-Go (OTG). This allows you to charge any USB device by simply connecting the cable to an OTG compatible smartphone without any other power source. Ideal for transferring power from one smartphone to another to help friends and acquaintances with an empty battery.

Technical details

Material	Nylon fabric / aluminium / plastic
USB port	USB 2.0 + USB-C combo plug
Charging current	Up to 3A (3 devices simultaneously)
Length	120 cm
Compatibility	Suitable for all devices with Apple Lightning, Micro-USB or USB Type C connection
Power sharing function via OTG	Yes - for almost all OTG-enabled smartphones (except for individual Samsung Galaxy models)
Charge multiple devices at once	Yes
