# DYMO LabelWriter 5XL: How to print with DPD

# DYMO LabelWriter 5XL: How to print with DPD

Here you will see how you can print an extra-large shipping label with a Dymo LabelWriter 5XL without using the Dymo connect software:

1. Download and install the Dymo Connect software
2. Connect the Dymo LabelWriter 5XL as described
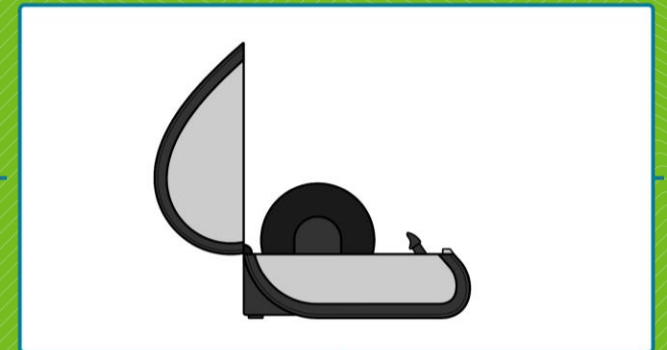

(follow installation instructions from manual)

CONNECT POWER CABLE TO MAINS AND PRINTER
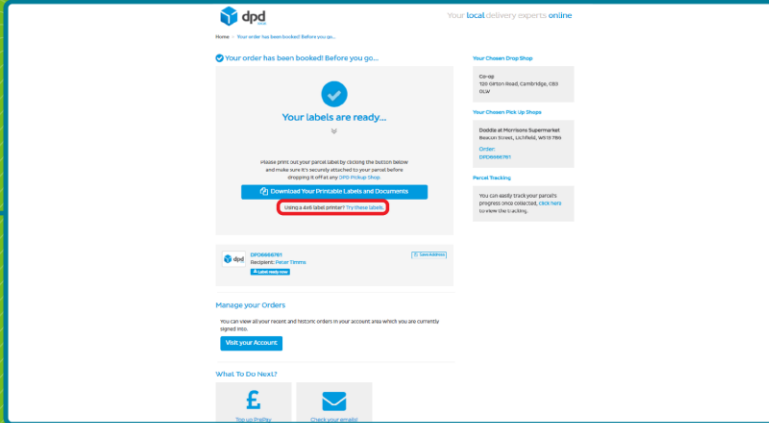

CONNECT USB TO PRINTER AND LAPTOP
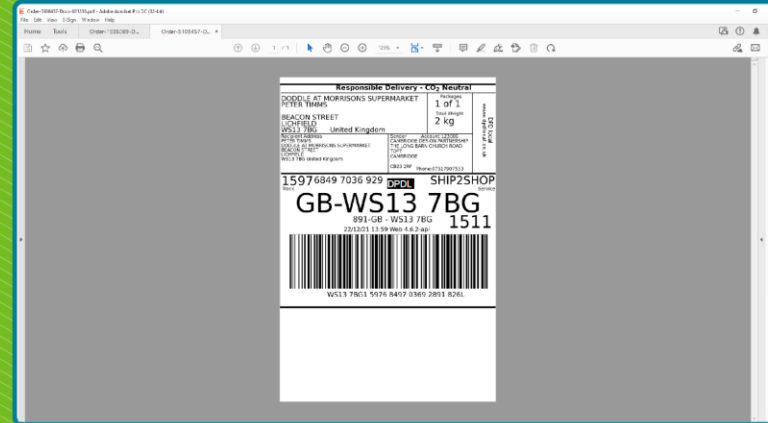

PRESS POWER BUTTON

ENSURE LABELS ARE LOADED
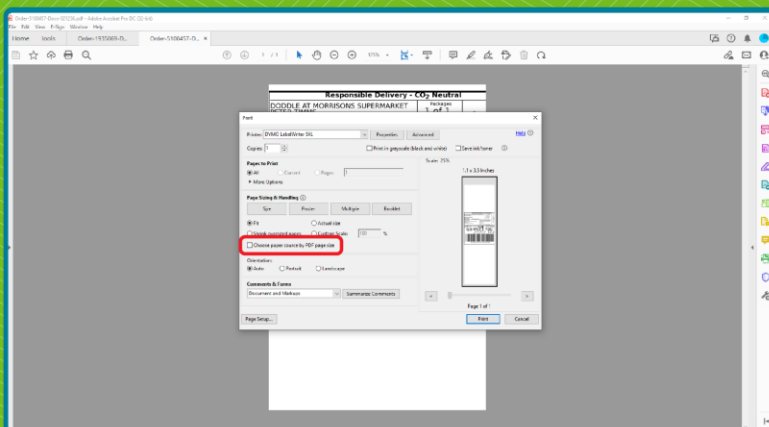

DYMO®

DYMO LabelWriter 5XL: How to print with DPD

SELECT 'TRY THESE LABELS' NEXT TO 'USING 4X6 LABEL PRINTER
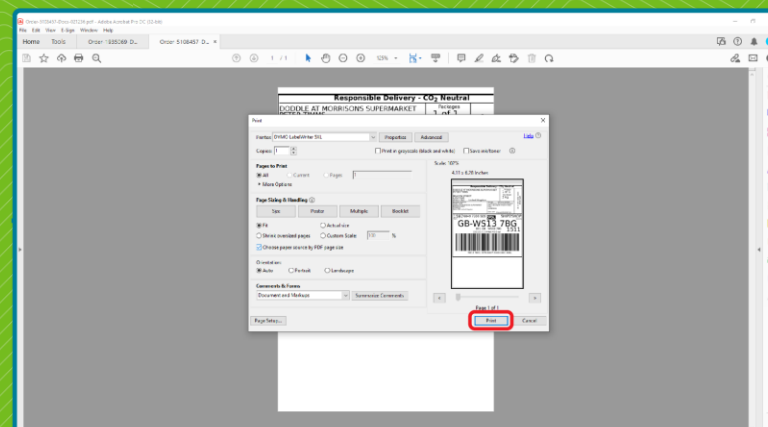

!
The download for 4x6 labels is a small link on the download space and could be missed – the large download option is for A4

SELECT FILE > PRINT

!
Label does not fit the 4x6 size properly – customer may think that the label size has not been generated properly or is in the wrong orientation due to the excess white space on the label.

SELECT 'CHOOSE PAPER SOURCE BY PDF PAGE SIZE'

!
Printing settings and defaults will change depending on software used to download the pdf. In this case Adobe Acrobat was used to view the downloaded label.

SELECT PRINT

LABEL PRINTED

PRINTED LABEL CAN BE STUCK ON PACKAGING

Forest Stewardship Council®
DYMO® paper products are FSC® Mix meaning that these products are made of material from well-managed, FSC®-certified forests and other controlled sources.

BPA free LW paper
DYMO® LabelWriterTM labels are free from BPA.
BPA is an artificial coating which can negatively impact the health of its users and the environment.

No Ink or Toner
DYMO® products incorporate thermal printing technology, that eliminates the use of ink cartridges or toners.
