Windows®

One USB Type-A port on your host computer

Or one PS/2 port on your host computer

## KEYSONIC **KSK-3011 ELU** Super-mini USB Keyboard with Backlight for Windows®

### Writing with ease

The KSK-3011 ELC is the ideal keyboard for those who value design and functionality. The compact design saves space on the desk, while the white backlighting ensures good visibility of the keys even in poor lighting conditions. At the same time, the super-mini keyboard does not sacrifice typing comfort.

### No compromises

The balanced backlighting allows you to write accurately even in low-light conditions. The X-Type membrane technology ensures a pleasant writing feel, and the clear, albeit compact, key layout prevents mistyping.

### Well informed

The compact keyboard has an integrated number pad. Despite its compact design, it offers full functionality and enables fast and precise working. In addition, it has three LED indicators for NumLock, ScrollLock and CapsLock, providing information on the status of the key settings at all times.
