Multi-Socket CPU Cooler M403PRO

The compact M403PRO tower cooler is the multi-socket cooler from the Performance C series. It has three extremely powerful heatpipes, which dissipate 150W of waste heat to the countless cooling fins, making it predestined for powerful multi-core processors. Due to the direct contact of the heatpipes, the heat transfer between CPU and cooler is extremely efficient and very even.The multi-socket makes the cooler usable on all current Intel and AMD sockets. In addition to the cooler and the PWM controlled 120mm fan, the scope of delivery includes a mounting module for Intel and AMD sockets, an illustrated installation manual and a tube of thermal paste.
